Use the supplied artwork

The reference PNGs guide the illustrated art direction. The SVGs are a simplified editable edition, not exact tracings. Use svg/khun-boon-neutral.svg as the implementation source of truth.

Keep his Thai identity

Preserve the blue-and-cream woven sash, side knot, polite wai and coconut-sweet hospitality. Keep the reading glasses and notebook. Avoid royal, sacred, riding or circus imagery.

Pose keys

welcome, offering, notes, guide, calendar, success, puzzled, resting, goodbye. Six separate head-expression variants and one neutral master are also included.

Animate gently

Separate groups expose the ears, eyes, trunk and props. Still by default; opt into an 8-second blink, small ear motion and one 2-second goodbye wave. Always respect reduced motion.

Keep the experience accessible

Use readable 17px copy and 44px tap targets. Dismiss in one tap. Keep important content visible. Never communicate errors or completion through the picture alone.

Files to give Claude

CLAUDE-HANDOFF.md, manifest.json, the svg/ folder and, for React, all files in react/. The offline index.html previews every pose and both colour modes.

Implementation scope

This package contains design assets and a starter component. It has not changed or deployed a website. Copy and reminder logic require verification before use.
